

Pre-Test Collection Information

Non-invasive Prenatal Test

Your doctor has requested a Generation Non-Invasive Prenatal Test (NIPT).

This test can only be performed after the 10th week of pregnancy.

This test is only available at select centres on the following days:

Generation and Generation 46 - MONDAY to FRIDAY.

Generation PLUS - MONDAY and TUESDAY ONLY

To find a location visit qml.com.au, click find a location and select the test from the 'Any test' menu using the Search by day, time or test filter

WHAT TO EXPECT:

- You will be required to sign and bring the Generation® request form (given to you by your doctor) along to the collection centre. Please read any forms given to you carefully before signing.
- A tube of your blood will be drawn and sent to Genomic Diagnostics. Please let the collector know if you are feeling anxious and unwell or have fainted during previous blood tests.
- Test results will be sent directly to the healthcare provider that ordered the test. You will need to make an appointment with them to discuss results.

FETAL SEX

If you do not wish to know the sex, please tell your healthcare provider.

LIMITATIONS OF TEST

This screening test only tests for the chromosomal abnormalities requested. Normal test results do not eliminate the possibility that your pregnancy may have other chromosomal abnormalities, birth defects, or other conditions. A normal result does not guarantee a healthy pregnancy or baby. This test has limitations including false positives and false negatives. For these reasons it is strongly recommended that no irreversible clinical decisions be made based on these screening results alone.

Staff and patients need to work and be cared for in a safe environment. Violence and verbal abuse will not be tolerated.
