

The new home of pathology for Western Australia and the Northern Territory

Introducing 1 Sabre Crescent, Jandakot, WA 6164

Our team at Vetpath Laboratory Services is proud to provide vital veterinary pathology services. Along with our sister company Western Diagnostic Pathology, we conduct more than 40,000 tests each day and continue to expand the range and volume of tests we're able to provide. But we've outgrown our current facilities, so we're moving to a new location.

From the end of April 2021, we'll be operating from our new purpose-built facility in Jandakot. This facility allows us to bring our operations under one roof, with modern equipment and new technology to help us deliver the high quality services the community has come to expect from us.

This move allows us to implement a range of improvements that aim to reduce turn-around time for results, while maintaining the accuracy and quality. It also allows our team of more than 400 professionals to work more closely together, sharing their expertise across a wide range of disciplines and helping us to deliver the most efficient and up-to-date pathology services.

What this move will mean for you

Our commitment to high quality, accurate results will not change. While moving a laboratory is a complex task, it's one that's already three years in the making. We aim to

minimise disruption to our services by making use of our satellite facilities and ramping up new test instruments in parallel with existing work. Much of this is already underway.

Members of our team will speak with you directly on any matters that might impact you. In the meantime, thank you for your support in helping us deliver this important chapter in our evolution.

Some of the changes that may apply:

- Some specimen pickup times may be adjusted but these will be discussed with you in advance to minimise any disruption.
- A new phone number, address and stores email will apply and we will advise you of these closer to the time.

>>> CONTINUED OVER

Looking to the Future

Our new facility in Jandakot incorporates modern technology with room to grow, allowing us to best serve the community with timely, accurate and high quality pathology results.

This new location allows us to:

- Enhance our courier and logistics network to help us optimise the pickup and delivery of specimens to the laboratory.
- Improve turnaround for samples that previously needed to be sent on to other facilities, as these will now be under one roof.
- Modernise our stores facilities and transport access making the receipt of deliveries smoother and our supply of stores to practitioners more efficient.
