

Allercept™ IgE

HESKA Allergy Testing

SAMPLE REQUIRED:

Whole blood in a serum tube, minimum of 4ml whole blood

BLOOD TUBE REQUIRED:

Serum tube, red top or gold top

Indications:

- For evaluation for inhaled allergens in dogs with confirmed atopy.
- Food allergens are NOT included in the testing panel.

Collection Protocols:

Steroid therapy should be withdrawn prior to testing.

Antihistamine therapy can be continued prior to testing.

Results reported to the clinic include contact details of veterinary dermatologists who can advise on specific therapy.

Allergens contained in the panel include:
