

Poisoning Panel - General

SAMPLE REQUIRED: Urine

BLOOD TUBE REQUIRED: Sterile container

Indications:

- Investigation of suspected exposure or toxicity with common stimulants, depressants or strychnine.

Collection Protocols:

- Urine should be collected as soon as possible after presentation, if poisoning is suspected. Samples should be stored frozen if not immediately submitted to the laboratory.

The test panel includes the following compounds:

Amisulpride	Doxylamine	Naproxen	Sertraline
Amitriptyline	Duloxetine	Nicotine	Strychnine
Amphetamine	Ephedrine/Pseudoephedrine	Nortriptyline	Sympathomimetic amines
Aripiprazole	Erythromycin/Fentanyl	Olanzapine	Theophylline
Aspirin	Fluoxetine	Opiates	Tramadol
Barbiturates	Fluvoxamine/GHB	Oxcarbazepine	Trimethoprim
Benzhexol	Hydromorphone	Oxycodone	Trimipramine
Buprenorphine	Ibuprofen	Paracetamol	Venlafaxine
Bupropion	Imipramine	Paroxetine	Verapamil
Caffeine (not usually reported)	Ketamine	Pethidine	Zolpidem
Cannabinoids	Lignocaine	Phencyclidine	Zopiclone
Carbamazepine	LSD	Phenethylamine	
Celecoxib	MDA (metabolite of ecstasy)	Pheniramine	
Chlorpheniramine	MDM (ecstasy)	Phenothiazine metabolites	
Cimetidine	Mefenamic acid	Phentermine	
Citalopram	Mephedrone	Phenylephrine	
Clomipramine	Methadone	Phenylpropanolamine	
Cocaine Metabolites	Methamphetamine	Pholcodine	
Dextromethorphan	Methylphenidate	Prednisolone/Methylprednisolone	
Diacetylmorphine	Metoclopramide	Propofol	
Diclofenac	Metoprolol	Propoxyphene	
Dihydrocodeine	Mirtazapine	Propranolol	
Diltiazem	Moclobemide	Quetiapine	
Diphenhydramine	Morphine	Quinine/Quinidine	
Dothiepin	Naloxone	Ranitidine	
Doxepin	Naltrexone	Risperidone	

This test panel does NOT include 1080, organophosphates, metaldehyde or rodenticides. If poisoning with any of these agents is suspected, please refer to the Vetnostics Price List for additional information.
