

Dexamethasone Suppression Test

Your Doctor has asked for the following test to be performed.

Instructions:

1. You will need to make an appointment for this test.
2. No preparation or fasting required.
3. This test is performed on two separate days.
4. **Day 1** - A blood sample will be collected between 8:00am and 9:00am prior to taking the Dexamethasone tablets.
5. You will be asked to take two Dexamethasone tablets, with 1 glass of water at 11:00 pm of Day 1.
6. **Day 2** - Return to the Collection Centre between 8:00 and 9:00 am to have a second blood sample collected.
7. This completes the test.
