

Donor:

If you are required to have a legal drug screen, the preferred option is to go to a Lavery Pathology Accredited (AS/NZS 4308) collection centre. This will ensure that the collection procedures comply with the Australian Standard (AS/NZS 4308). Our Designated AS/NZS 4308 collection centres have been setup to facilitate sample collection according to the standard.

What is Expected?

Prior to testing, you will be required to:

1. Make an Appointment with the nearest Lavery Pathology AS/NZS 4308 collection centre. (Some centres cease legal drug screens at earlier cut-off times than publicised opening hours).
2. **The Australian Standard (AS/NZS 4308) requires evidence of donor identity. To satisfy this requirement bring photo identification (i.e. Current drivers license, passport, employer photo ID. etc) The preferable collection appointment time is between 11:00am and 3:00pm. If you cannot provide photographic identification, we are unable to perform the collection unless your Requesting Authority can confirm your identity.**
3. On your arrival you will be asked what medication you are currently taking.
4. You will then need to provide a urine sample under supervision.

Who do you Contact if you have any Questions?

Your first point of contact is your Requesting Authority. In many cases this will be your employer and their appointed delegate (often the Workplace Health & Safety Officer, Personnel Supervisor, Human Resources Manager or a General Practitioner can also request this test.) If they are unable to assist with your enquiry, they will usually contact our toxicologist and report back to you.

If not, you can call our Commercial Department who will assist you on (02) 9005 7090.

Please note: Out of pocket charge may apply.

Check with your requesting Authority.
